

What you can achieve.

Thirteen industries, one always-on voice desk fluent in 14 languages (Arabic included), one pattern: AI agents that finish the job and get billed per outcome. Every card below is a workflow we're ready to audit, build, and run against an SLA — pick the row that looks like your team's week. Hubs in Melbourne, Dubai and Riyadh.

Inbound hotel / restaurant calls → **confirmed bookings** in 60 seconds.

BEFORE	WITH AGENT
Front desk covers the phone and check-in; bookings missed after 10pm; guests repeat the same requests to three staff.	Answers the phone in the guest's language, books, upsells, confirms, writes the PMS note , routes complex asks to a human.

PER CONFIRMED **A\$1.60**

Driver updates + exceptions → **live ETAs, customer notifications, clean POD.**

BEFORE	WITH AGENT
Dispatchers juggle phone + WhatsApp + TMS. Exceptions discovered when the customer calls, not before.	Ingests GPS + driver voice notes, predicts ETA slips , writes the customer update, drafts the exception claim packet.

PER SHIPMENT **A\$0.92**

Body-cam & voice notes → **structured case files, chain-of-custody locked.**

BEFORE	WITH AGENT
Officers finish shift, spend 2+ hours retyping incident notes. Evidence logged on paper, indexed weekly. Court filings stall on admin.	Ingests body-cam audio + voice notes, writes the structured report , inventories evidence with cryptographic chain-of-custody, drafts the court filing.

PER REPORT **A\$4.80**

— FLAGSHIP · CROSS-CUTTING

A voice desk. In 14 languages. That never misses a ring.

One AI phone desk that slots into Aircall · Twilio · RingCentral · Zoom Phone · GoTo. Answers inbound in under two rings, runs outbound against your list, warm-transfers on edge cases, writes the CRM note and the action items. Every call transcribed, scored and stored — with an audit log your ops team can replay.

Fluent, not translated: real-time conversation in the caller's language, not a bolt-on transcription pipeline. Regional accents supported, tone matched to brand voice, escalation-aware.

— HOW THIS GETS SHIPPED · §

From a workflow audit to a billed outcome.

Every engagement follows the same four-beat. Two weeks in your team, two weeks in build, then agents running against a contract SLA — billed per finished unit, credited back when they miss.

01 Workflow audit Ten working days observing the job end-to-end. Maps the manual path, finds the bottleneck, prices only what we can ship.	02 Agent build Wire the agent into your stack — EMR, ERP, CRM, phone — with audit logs, credit-back SLA, and a read-only ops console for your team.
03 Shadow + cutover Agent runs alongside humans for a sign-off window. Confidence scores reviewed, threshold agreed, cutover signed by a named owner.	04 In production Every outcome timestamped, billed per finished unit, audited on the console. Miss SLA, the outcome is free — automatic on the invoice.

Bring us your **week's worst** workflow.

Two weeks, one workflow, no obligation. If we can ship agents against a contract SLA, we price it. If we can't, you walk away with the diagnostic report — on us.

Agents that **finish.**

Autopilot Labs is an AI workflow studio with hubs in Melbourne, Dubai and Riyadh. We build vertical agents across fourteen practice areas — thirteen industries plus an always-on voice desk in 14 languages (Arabic included) — and bill per completed outcome. Not per seat, not per token.
