

# A studio, not a platform.

Autopilot Labs is an AI workflow studio — started in Melbourne, with hubs in Dubai and Riyadh, deployed globally. We build vertical AI agents across fourteen practice areas — thirteen industries plus a voice desk fluent in fourteen languages (Arabic included) — and bill per completed outcome. No product roadmap. No free tier. No self-serve sign-up.

## — WHAT WE COVER

# Fourteen practice areas. Nothing else.

We don't build horizontal AI. Each practice area ships a pre-priced catalogue of agents, a target SLA, and a shortlist of workflows we're ready to run — including an always-on voice desk in 14 languages (Arabic included) and a new Public safety & justice practice that slots into Aircall, Twilio, RingCentral, or your existing stack.

— WHERE WE WORK

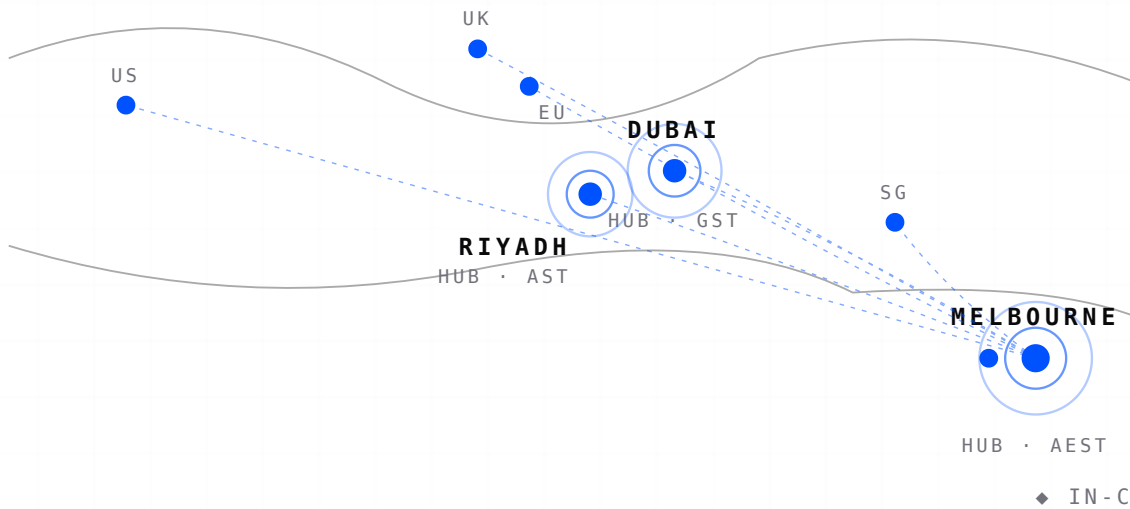

# Started in Melbourne. Hubs in Dubai & Riyadh. Shipping globally.

Three hubs — Melbourne (AEST), Dubai (GST) and Riyadh (AST)  
— cover clients across APAC, the Gulf and MENA, Europe, and  
the Americas. Agents run in customer-selected regions — AU,  
UAE, SA, UK, EU, US, SG — with data residency committed in-  
contract, including full support for PDPL and UAE Federal Data  
Protection Law.

We work primarily in English and Arabic, with multilingual voice-  
agent coverage across 14 languages. Integrations cover 120+  
tools — EMR, ERP, CRM, phone, helpdesk, and the line-side  
systems that every manufacturer swears are one-of-a-kind.  
Regional GCC systems covered include Amiyah, Lean Business,  
Elm and Mashroat where relevant.

— HOW WE WORK · FOUR ARTICLES

# The rules we won't negotiate.

## ARTICLE 01

### Audit **before** build.

Every engagement begins with a free two-week workflow audit. If the math doesn't work, we say so and leave the diagnostic behind. No audit, no build — no exceptions.

## ARTICLE 02

### Outcomes are the **only** unit.

Seats are a rounding error. Tokens are our cost. You pay per finished unit with an SLA in the contract. Miss the SLA, the outcome is credited back automatically.

## ARTICLE 03

## ARTICLE 04

Nine areas. **Nothing else.**

We turn down work outside our fourteen practice areas. Depth beats breadth. We already know what a SOAP note is and why your LegalHold tag matters — no relearning on your retainer.

A human **signs** every outcome.

Every SLA-gated workflow has a named reviewer on our side, not just a monitoring dashboard. An agent runs the work. A person is accountable for it.

# Two weeks. One workflow. **No obligation.**

We spend 10 working days observing the job end-to-end. If we can ship agents against a contract SLA, we price it. If we can't, you walk away with the diagnostic report — on us.

## Agents that **finish.**

Autopilot Labs is an AI workflow studio with hubs in Melbourne, Dubai and Riyadh. We build vertical agents across fourteen practice areas — thirteen industries plus an always-on voice desk in 14 languages (Arabic included) — and bill per completed outcome. Not per seat, not per token.
